Dear FCC,

I respectfully urge you to reject NAB's petition 04-160. I have been a XM satellite radio listener for 2 years and I enjoy the variety of services satellite radio offers. I am a traveling IT professional and I use the traffic and weather services when I am driving from state to state. Since I pay for this service like I pay for cable television, the NAB can not and should not be allowed to dictate what services I should receive. As an American consumer I have a choice for television, music, phone service, and any other services that other companies provide. For whatever reason that I choose one product over the other is my right as a paying customer and it is unfair to take that choice away because the NAB feels threatened. Please be fair and balanced as every American values their right to choose.
